DUSTIN SUMMEROUR

SIMULATION ENGINEERING STUDENT | C++ & SYSTEMS DEVELOPMENT

Anderson, South Carolina | summerourdustin8@gmail.com | github.com/Itchigo420

PROFESSIONAL SUMMARY

Simulation Engineering student at Full Sail University building C++ applications, diagnostics, and Linux-based tools. Skilled in object-oriented programming, testing, debugging, Git/GitHub, Python, and containerized workflows. Seeking opportunities in software and systems engineering.

TECHNICAL SKILLS

Programming: C++, Python, HTML/CSS, JSON, object-oriented design, input validation, debugging

Developer tools: Git, GitHub, CMake, CTest, Visual Studio, VS Code, Linux, Docker

Systems: CPU/memory diagnostics, task monitoring, Raspberry Pi, Windows/WSL2, PostgreSQL, SSH

ENGINEERING PROJECTS

REAPER - C++ Task & System Console | Project & Portfolio I | 2026

- Built a task manager with priority levels, completion status, filtering, sorting, and clear console menus.
- Added input validation, safe ID handling, processor/memory reporting, and CTest regression coverage.
- Used focused classes, Git branches, pull requests, and milestone documentation.

REAPER - Personal Systems Lab | Independent Project | 2026-present

- Configured a multi-node Linux/Windows/Raspberry Pi environment for local AI, monitoring, and automation.
- Integrated Docker-hosted services and diagnostics with backup and recovery workflows.

EDUCATION

Full Sail University - B.S. Simulation Engineering (in progress; expected 2028)

Relevant coursework: Programming I & II, Systems Programming, Calculus, Discrete Mathematics.

Full Sail University - Digital Cinematography coursework

Additional background in digital production and media technology.

EXPERIENCE

General Manager - Ride Fast LLC | 2020-2021

Led operational workflows, inventory decisions, documentation, and customer communications.

PORTFOLIO & REPOSITORIES
